BOOK SYNOPSIS

Grounded in more than 20 years of research, this valid, reliable, easy-to-administer instrument is widely used by mental health, educational, and medical practitioners in screening, diagnosis, and treatment evaluation. Parent questionnaires on home behaviors (English and Spanish) and teacher questionnaires on classroom behaviors are keyed to DSM-5 diagnostic criteria for attention-deficit/hyperactivity disorder (ADHD). Each scale takes just 5 minutes to complete and comes in both a child (5-10) and adolescent (11-17) version, with developmentally appropriate symptom descriptions. Complete instructions are provided for scoring and interpretation, including separate scoring profiles for symptoms and impairments in boys and girls. New to This Edition: *Updated for DSM-5. *Separate adolescent versions of both home and school rating scales. *Includes functional impairment items linked to each symptom dimension (inattention symptoms and hyperactive-impulsive symptoms). *Full analysis of the revised scales psychometric properties. QUICK VIEW What does it do?: Quickly determines the frequency and severity of ADHD symptoms and impairments. Age Range: 5-17 Administration Time: 5 minutes for each scale. Format: Parent-report and teacher-report rating scales (includes parent forms in English and Spanish). Cost of Additional Forms: No cost--purchasers get permission to reproduce the forms and score sheets for repeated use. Includes Permission to Photocopy: Enhancing the convenience and value of the [ital]ADHD Rating Scale-5[/ital], the limited duplication license allows individual purchasers to reproduce the forms and score sheets for use with their clients or patients, yielding considerable cost savings over other available scales. The large format and sturdy wire binding facilitate photocopying. Age range: 5-17.
